**JOB FAIR**

**Job Fair**

The Job Fair was an event organized by the Student Life Organization in order to give students of all ages an opportunity to make changes to their school community. Each department was required to promote a particular job using a unique advertising technique. The Academics Department had a "Spin the Wheel" contest. They asked students questions from various subjects and gave stationary items as a prize when they answered correctly. The Discipline Department put together a makeshift basketball competition. They also generously gave out pins with positive words like "Anti-Bullying" and "I Discipline." The Social Responsibility Department portrayed an image of a world without pollution: a world where humans play a positive role in our environment instead of a destructive one. As part of the Management Department, the IT team developed a program that allows students to register for team building activities. Furthermore, the media team gathered yearbooks and displayed them beautifully for all to see. The Lower School Department ensured that this year's minions theme has been maintained. They also gave out treats to the kids while playing a snakes and ladders game. The Outreach Department held a cupcake competition. They also made sure that their Life Vest Team would surprise attendees with their best performance. Both the Activities Department and the Sports Department displayed previous events and joyfully remembered old times. All in all, it was a day to remember.
