

PIZZA MAKING And Flower planting

We invited all our KG1 students and their parents to a special parent-child bonding event that took place in the school Cafeteria. Each section arrived at different times to create a more intimate and personalised environment for our students and their parents. SLO prefects were on hand to ensure another smooth-running event, including each section's class teacher, in order to share the fun afternoon. The SLO organised for a special child-friendly company to guide the students with their first activity, making pizza. Each had the opportunity to knead their dough and create a delicious pizza from scratch. While the pizzas were cooking in the oven, the next activity was designing gingerbread men with icing and pieces of candy. Finally, the last activity was planting flowers, an important exercise as ISC Dubai is attempting to make a leap in its green footprint to promote the UAE 2021 Vision, through educating children about environmental awareness and creating a greener society. The day turned out to be a great success, incorporating culinary and environmental education into a fun, physical activity for our 4 year olds.
